DIGITAL LEADERS

Welcome to the Digital Leaders' Monthly Newsletter!

This month we have lots of tips for you all about keeping safe while playing games online!

Choose games carefully

Don't have any shame in blocking a game! You can block apps or games which are not appropriate in the app store - ask your grown up for help!

Check the age rating of the games you play.

Some games are not suitable for younger children. Check before you play!

Be careful with added extras.

Marketplace items and add ons can lead to unexpected spending if controls are not set up.

Chatting and gaming

Beware of the chat features in online games. Do you only chat with people you know in real life?
You can block, report or mute anyone who isn't being kind in an online game. Don't share personal information with people on games. Don't use your real names.

Ask for help!

Remember! If you see/hear anything that you don't like when gaming you should always tell an adult.
